Gen. Grant Declines a Public Demonstration.

Gen. Grant declines to day a public demonstration in his honor, tendered by the various Republican associations of this city. This afternoon a committee consisting of delegates from the Sallors' and Soldiers' Republican Committee, officers of the Boys in Bure, the President of the Central Grant Club and Mayor of Washington, together with the Aldermenand other prominent citizens, called on Gen. Grant by appointment. The object of the visit is stated in the following address of the Mayor:

GEN. GRANT—in behalf of the citizens and the Republican organizations of this city, we have called to tender our hearty congratulations on the result of the recent election, and make known to you their wishes, that they be permitted to attest their feeling of happiness and joy by a proper public demonstration, welcoming you as the President elect to the Capitol of the maken, as they were despited of that pleasure on your arrival here by a sort of fank movement by which you stole a nared inportour respict to the treatment of their request, and name the time and place that will be most agreeable to you for such a demonstration.

matter.

Gen. Grant then said:
I am not unuindful of the feeting intended to
be displayed by a public demonstration, and you
must take all this for "granted." [Laughter.]
The company then retired.

Governor Brewmlew's Message.

Nashville, Nov. 10.

Governor Brownlow's message was read in the isensie to day. He recommends that measures to adopted to wind up the Bank of Tennessee, In regard to the criencion of franchise, he suggests that there abould be a discrimination exercised concerning those who were in rebellion.

They are not all alike calpable for the past nor untreatworthy for the fature. For those who were involuntarily driven into the service of the rebellion and who since its inter failure have given evidence that they accept the result in good faith, that they are good clitzens, quiet and law abiding; that they have sirectly observed their parote; that they made affectly observed their parote; that they will not use political power to prosectibe and degrade those whom the war has emancipated and invested with the signis of clitzens for disfranchised persons—Of this description the franchise might safely and therefore whely be extended. The extension should, however, be applied with suitable guards and checks that advacage could not be taken of its liberality is the danger and harm of the State.

The Next Senator.

Our next Legislature is to choose the successor of Senator Buckslew, and it is to be hoped that ita selection will be a wise one. l'enusyivania is the second State in the Union in political able. ower; she has great business interests, her population, her wealth, her internal improvements. her varied industries all demand that her Senstors should be men of ability, rips experience and comprehensive views. But our Senator should not only appreciate the wants and inter esta of his State, so far as they may be effected by Faderal legislation he should also be a tried and true Republican, one who has been thoroughly identified with the history and organization of the party, who is in full sympathy with its principles, who enjoys the confidence, and who is fitted to take an active and leading part in the National councils, under a Republican administration. We have many able and decerving men in the ranks, who

possess the qualifications we have indicated. But we apprehend that the question of locality will have considerable bearing on the choice to be made. Gen. Cameron, Gov. Geary, the Attorney General, and most of our State officers are from the Eustern section of the State. It rould seem only fair, therefore, that the next Senator should be taken from the North. And among the possible candidates from this section Hon, Gainsha A. Grow is prominently numed and urged by the press in different sections of the State. Mr. Grow's Jong experience in legis-lation, the purity and consistency of his political course and public life, his high ability as a par-Hamentary debater, all recommend him very strongly for the Senatorship. As Cheleman of the State Central Committee, he has organized rictory for the party in our late political contest in this State, and contributed largely by his zeel and well directed management to defeat the machinations of Wm. A. Wallace for throwing he State into the arms of the Democracy. No selection would secure a more hearty endorsement in this part of the State, than that of Galu

Letter from Montana Territory. The following letter I om a former citizen of Titusville to a friend in this city, gives an interesting account of Utah and the mining operadons and prospects of the Western territories HE: CNA. M. T., Oct. 14, 1868. FRIEND A--: -This place is a long way to-

ards the setting sun, being some 2,000 miles west of Chicago. The mining operations of this ountry are truly wonderful. Gold in very large quantities continues to be found in this territory This city resembles very much indeed the cities of the old country; there is the same exeitement as in the petroleum trade, the same isks and the same great strikes are frequently made. You should by all means make a trip per gallon in Philadelphia. over the Pacific Railroad, and through the our ing regions of the Rocky Mountains. I wish were here now, to ride with me on horse back over the mountains and through the valleys of this interesting region. At Silt Lake City, Utah, I spent a number of days, and during the in the peculiar religion of the Morman people. I visited Brigham Young at his house and had quite a long talk with him. They have made a seauliful garden lu the desolate waste. Where once the alkaline sauds of the desert, bore here and there but scanty tufts of sagound cacti, now flourish orchards loaded with fruit of the most lucious varieties. They have made the wilderness to bloom like the ed for relief to Dr. Aborn, at 124 Smithfi.16 bave a city the best ordered, the best governed Pittsburgh. Here' eved me at once, and from of any city in the world. Brigham Young rules with a mighty hand the destenies of his peculiar people. While along the line of the Pacific Rallroad stevery turn and depot, you hear awful curses and see undescribable sights of wickedmess, when you reach the Mormon frontier you hear songs of praise, and listen to leavent prayer to the throne of the Almighty. While before you kept one hand on your pocket book and the on the handle of your revolver; now you can lay your watch down on the street corner and pile up your doublooms by the way-aids with the assurance that it will not be disturbed

> The strong arm of the government must be raised to emite this people, and to remove the foul blot that stains our national name. This twin eister of slavery must follow the fals of its elder relative and sink to perdition. This war is as inevitable as the conflict for the extinction of slavery. When it comes it will be bloody, for the Mormons are bigoted fanatics, and they hate our government and are as disleyst as the most platant rebel. They claim 20,000 inhabitants in

This place (Helena) is about 750 miles from the nearest railroad, which distance has to be traveled by stage, a very tedious and dusty ride Just here immense quantities of gold is washed from the gravel in the ravines, one firm washing out \$1,000 daily. The quartz lodes, however, promise the most permanent yield, and much expensive machinery is being erected in the mountains. I believe the richest veins have only o the Vice President's chair. reprict but five of those being drilled on the first have been completed, thus having the number now drilling fifteen in excess of that on that date, or a total at the present time of 450. This shows that the development of oil territory is being prosecuted on a very large scale, certainly larger than at any other time since the close of the period of excitement in the summer of 1885. and we think that if an accurate account could be had of the number of wells being drilled durshown that the present number is fully as large. The increase in development does not necessarily determine that there will be an enlargement of the production like that which took place during 1865, as, since then, the average production of the wells has declined very materially, and the time which a majority of the wells produce has been greatly shortened. At one time to the above year there were ton or afteen wells which produced upwards of ave bundred barrels a day, while at present the largest yield from one well does not exceed one bundred and sev enty-five barrels, and a majority of the wells are producing less than thirty barrels per day.

introduced to Europe with success, and the de mand for it is increasing. The first cargo of it was received at London a few weeks ago. A late London petroleum circular says, "this of has already acquired a high character for lubri-cating purposes." The production of this quality of oil in this vicinity is now limited, and is onfined to two or three wells at West Hickory A project to supply two or three of the railroads running through New York State with this off material of the lard and other olls which are now pengused on them for lubricating purposes, was talked of a few weeks sluce, but no definite conclusion was arrived at. A new well wes struck last week on Lease No. 2 of the Shamburg Petroleum Company's tract, Upper Cherry Run, and yesterday it was producing at the rate of fifty barrels per day. the production was increasing steadily at last accounts, and a product of one hundred harrels per day is looked for. The working interest is owned by Messrs. Lockbart & Frew, W. H. Abbott and Thomas C. Weaver.

Weston's Great Walk. On Monday the pedestrian, Weston, comme ed his great fear of walking 5,000 miles in one bundred days for a purse of \$20,000. In the ac complishment of this task Sundays are excluded, learing him 86 working days, and thus compell ing him to average 58 1-7 miles per day. The trip will extend from Bangor Maine, to St. Paul, Mituesotta, and thence back by a different ronte, to the city of New York. On the march, Weston will puse through 17 different Status, 188 counties, and 728 cities and towns. When he reaches Bt Paul Minuceous, he will have walked 3,033 miles. He returns by a route that will bring blue to City Hall, New York, at the end of 5,024 miles. His journey westward take him slong a similar route, as far as Chirago, to that traversed by him last year. His feat of walking from Portland to Chicago was not to be compared, as to the magnitude of the difficulties to be overcome, to the one now proposed -

required to walk an average of but 47 miles daily and that in a far more propidious season of the year. His proposition to walk 5,000 miles, averaging 58 1 7 miles a day, at a season when even the progress of railroad trains is frequently impeded by heavy falls of anow, can only be regarded as the height of folly or as a downright humbug.
